REASONS FOR ALLOWANCE

Claims 1-20 are allowable over the prior arts of record.

The following is an examiner's statement of reasons for allowance:

The present invention pertains to a specific method and pattern use for testing a flash memory device. The claimed invention (claim 1 as representative) recites the method steps of "... (a) erasing a flash memory cell array; (b) programming cells of the flash memory cell array except in a first diagonal; (c) reading cells in the first diagonal of the flash memory cell array; (d) programming the cells in the first diagonal of the flash memory cell array, and (e) reading the cells of the flash memory cell array except in the first diagonal." This particular method is used in order to speed up the testing process of the flash memory device.

The prior arts of record (Chang U.S. Patent No. 5,954,831 as an example of such prior arts) teach various methods and patterns for testing memories such as a sliding diagonal pattern and marching patterns. However the prior arts fail to teach erasing a flash memory cell array; programming cells in a first diagonal of the flash memory cell array in a direction opposite to the first diagonal; and reading the cells of the flash memory cell array except in the first diagonal (as in independent claim 18). Therefore, the sequential single diagonal method of erasing and programming a flash memory device is neither anticipated nor rendered obvious by the prior arts of record. Hence, claims 1-20 are allowable over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
